About This Game

Batteries Included is a Virtual Reality action / light-strategy game for the HTC Vive. Fall back into a nostalgic state as you return to the time of your childhood! Explore your bedroom and use keys to unlock the door to your imagination. Once in your imagination, wrangle mischievous toy Goblin Goons to the castle through various obstacles.

Each new level in Batteries Included will test your speed, cunning, and (most importantly) imagination as you find a safe path for your toy Goons. Will you knock down the Drawbridge Hex to open blocked paths, or place the Magic Wood-Block Hex to create new ones? Or maybe blast your goons out of the Toy Cannon Hex, or have them soar above danger using the Balloon Hex? Use your creativity to find your own unique solution! But watch out for obstacles like the Slippery Ice Hex and Abducting UFO which can throw a wrench in your plans!

Your toys need your help! Will you answer the call?

Features

- Locomotion Options - VR brings with it the possibility for VR sickness. Switch between two different movement systems (Point & Teleport, Smooth Motion + Fixed Pivot Rotation) to find which works best for you!
- Dynamic Hex Combinations - Explore levels made with more than six different hex types, each bringing their own challenge to discover and use to your advantage. Watch as these deceptively-simple hexes combine to produce interesting combinations that will test the limits of your problem-solving skills!

Octahedron update news:

While porting the game to the Switch (out on January 17!) Octahedron was moved to a new engine and has seen many code optimizations along the way. The Steam version has just been updated to version 1.2.4.4! Since the game's release in March 2018 there have been several updates, adding new features and improvements, as well as fixing bugs. The following is a summary of all the major things that have been added since launch (including the newest update):

(1.2.4.4)

- upgraded engine from Game Maker Studio 1.4 to 2.0
- new "HELP" option on level stat screen to explain medals, diamonds etc.
- new "COPY FILE" menu
- new "PERFORMANCE MODE" option: gives a further performance boost at a minimal visual cost, useful when playing on very weak CPU/GPU systems or when streaming the game
- new options on completed save files: turn off optional upgrades and only play levels with the minimum required platform upgrade

(1.0.7.4)

- option to display speedrunning timers added (global and per level)
- added tracking and saving of best level times (visible on pause stat screen)

(1.0.6.1)

-
- for higher difficulty levels there is now a "SKIP TUTORIAL LEVEL" option in the pause menu during the tutorial level
 - after a "Game Over" in Rogue or Rogue Extra mode there is now an option to "QUICK RESTART FROM LEVEL 1-1", so restarting the game with the intro and the tutorial level is no longer necessary

For more details and specific bug fixes, please refer to the pinned release notes in the Steam community discussions.

. Soda Dungeon Diesel Guns Pixel Shooter My Holiday Octahedron: Transfixed Edition **Transfixed, Free, Forever:**

Hot on the heels of Octahedron: Transfixed Edition's Switch release, I'm delighted to announce that all Steam copies of Octahedron have been upgraded to the Transfixed Edition for free! Download the game now to try it out!

I spend quite a bit of time chatting with players on Twitch, Twitter, Discord and the Steam forums, and I really wanted the Transfixed Edition to be the definitive version of Octahedron. So incorporating feedback and requests from the community was very important. And I'm happy to finally have all the new content available on PC as well!

Here are some of the major things that have been added to the Transfixed Edition:

Time Trial Medals . Demo available now!:

Hey all,

We are really happy to let you know that a playable demo for Octahedron is available now. You can access it by clicking the demo button on the store page.

There is a selection of levels you'll be able to jump into and play covering a variation of difficulties. We really hope you enjoy this sneak peak into the world of Veetrageoul and join us back here on March 20th for the full launch!
