A great inside look into the making of the game and the creation of the different designs for the characters. I almost never buy artbooks for games, but I loved the game and its story so much I couldn't wait to buy this book and learn more about what went into making the game!

[To anyone having trouble accessing it, you can get to this book and all the other DLCs through browsing the game's files after downloading them. Enjoy!]. I died in real life while playing this game!. Overpriced but GG. Imagine the original Speedball 2... now imagine it slowed down to a snail's pace, with a choppy framerate, ugly looking sprites and sub-par controller support. That's this game. Avoid at all costs, it's more of an HD♥♥♥♥♥♥up than an HD remake.. Like War Of Mine with story and romance.

. It was a fun little time waster. Nothing deep but decent mechanics and a couple hours of fun. Seems a little flat in the sound department, but I wasn't expecting much for 5\$. You'll most likely beat it in an afternoon, but it'll be worth it. Probably.. Fun VR Coop puzzle/platformer. One person in VR manipulating things, the other controlling a small robot with WASD on the mouse and keyboard. Still can't get past a specific level, but the puzzles I have played are clever and I've had fun playing through several of them repeatedly with different friends as I show them the VR experiences I have.

Definitely worth playing, if only to have a fun multi-player experience in VR.

The first one was good.

This one was even better. too slow for upgrades. Fun time killing game.. A strange game to play with headphones. It looks more like an experimental work than a game you should pay money for. The single objective of the game is to collect 10 blue balls using your ears (when you come near a ball, you will ear a rising sound, and you orient yourself depending on what you ear in your left or right ear). The concept idea is interesting but could be developed in something more than what is offered here. After finding 5 balls, you have seen all of what the game has to offer. For a walking simulator, I was hoping for more variety and things to discover, but it is mostly just rocks and trees everywhere.

I also did not really get the ending. I was not sure if it was a joke, or if the game was seriously expecting the player to pay attention to different shades of blue.

In all, it is an interesting idea for a game, but it could be more developed.. Great game more people need to buy this it's like an old school arcade game. With a modern flavor..

. Great classic Kent commuter train. Sounds however are atrocious, but Armstrong powerhouse fix that along with adding a free class 466, NSE and Connex reskins. Worth every cent if you buy the AP soundpack for it.

8-9V10 (with AP sounds and liveries) otherwise 5-6V10 (yes, it makes that much of a difference. probably the most worth sound pack.
